

TERRASANA OPENS CLEVELAND'S FIRST MEDICAL MARIJUANA DISPENSARY

CLEVELAND (March 28, 2019) – Terrasana Cannabis Company announced today the opening of its medical marijuana dispensary in Cleveland, Ohio. Located in Garfield Heights, the Terrasana dispensary is the first to open in the Greater Cleveland Area and will help bring carefully curated cannabis to local patients in need.

Terrasana brings a unique medical perspective to the market with health professionals from world renowned institutions and industry veterans serving as strategic consultants and advisory board members for the company. Senior leadership is also comprised of executives and owners from the legal, medical, operational, finance and real estate world – giving Terrasana the expertise needed to navigate the highly regulated market of medical marijuana.

“Our goal has always been taking care of people and providing them with a safe, welcoming environment to purchase medical marijuana. This dispensary gives us the opportunity to do just that,” said William Kedia, M.D., Terrasana Founder, Chief Medical Officer and Head of Research. “We look forward to connecting with the region’s patients and offering them a new, more natural solution to manage their medical conditions.”

In addition to selling high-quality product, Terrasana is focused on customer education. Terrasana’s staff understands that purchasing medical marijuana for the first time can be an intimidating experience, which is why the company is committed to helping new and existing patients understand the cannabis climate. This is done through the dispensary’s professional and highly trained patient consultants who are educated in the medical conditions they are treating as well as the products that will help the patients.

By introducing medical marijuana into the market, Terrasana is also hoping to help address Ohio’s opioid crisis by offering a more natural choice for treatment. Ohio has the second highest rate of opioid-related deaths based on data from the CDC’s National Center for Health Statistics. Terrasana is actively working with researchers to further validate cannabis as substitute to opiates, which will in turn reduce addiction.

The company currently has operations in Columbus and Cleveland, Ohio, with two additional stores opening in Fremont and Springfield, Ohio, in the next few months. For more information on Terrasana, please visit terrasanacannabisco.com/

ABOUT TERRASANA CANNABIS COMPANY
